

Part 1: This video includes: an introduction to the 2.5 hour lecture entitled Timeline To 2012 and lecturer, Ivan/Evon Stein; an over view of the lecture material; the concept of cycles, frequencies, and patterns in the micro and macro; how Ivan got started on his research and discovery; how his research answered questions, but also revealed completely new questions that even more important; as well as startling revelations related to the coming of a new Ice Age. Ivans conclusions are supported by concrete scientific data to the realization that Ice Ages are cyclical and Earth is about to enter a new Ice Age at any moment in time. His biggest questions then become What causes this pattern? And Why is no one talking about this?
