

What is officially known regarding the "Pulsating Orbs of Light" UFO's! The UK Ministry of Defense has revealed regarding these "Pulsating Orbs of Lights" UFO's.

Unidentified Aerial Phenomena (UAP) in the UK Air Defence Region

The Ministry of Defence has released this report in response to a Freedom of Information request and we are pleased to now make it available to a wider audience via the MOD Freedom of Information Publication Scheme. Where indicated information is withheld in accordance with Section 26 (Defence), Section 27 (International Relations) and Section 40 (Personal Information) of the Freedom of Information Act 2000.

That Unidentified Aerial Phenomenon (UAP or UFO) Exist is indisputable. Credited with the ability to hover, land, take off, accelerate to astonishing velocities and vanish. They can reportedly alter their direction of flight suddenly and clearly can exhibit aerodynamics characteristics well beyond those of any known aircraft or missile - either manned or unmanned.

The Conditions for the initial formation and sustaining of what are apparently buoyant charged masses (of Plasma), which can form, separate, merge, hover, climb, dive, and accelerate are not completely understood.

Dependent on a color's temperature and aerosol density, it may be seen visually, either by its self generated plasma color, by reflected light, or silhouette by light blockage and background contrast.

Occasionally and perhaps exceptionally, it seems a field with, undetermined characteristics can exist between certain charged buoyant objects in loose formation, the intervening space between them forms an area, viewed as a shape, often Triangular, from which the reflection of light does not occur. This is a key finding in the attribution of what have frequently been called black "Craft", often triangular and up to hundreds of feet in length. - The UK Ministry of Defence

Check out this document recently declassified by the UK Ministry Of Defense on Unidentified Aerial Phenomenon or UAP's, or as they are called in the US...UFO's

Some quotes from the above paper...

"The relevance of Plasma and magnetic fields to UAP(UFO) were an unexpected feature of the study"

In So Advising

- It should be stressed that, despite the recent increase in UAP/UFO events, the probability of

encountering a UAP/UFO remainns very low

- No attempt should be made to out-manoevre a UAP/UFO during interception
- At higher altitudes, although the UAP/UFO appear to be benign to civil air-traffic, pilots should be advised to not manoeuvre, other than put the object astern if possible
